Kaveen C Deshapriya

Full Stack Engineer

Anuradhapura, Sri Lanka kaveencdeshapriya@gmail.com +94711037357 Kaveen
Kaveen C Deshapriya Kaveen C Deshapriya

Summary

Innovative and results-driven UI/UX Engineer with a strong track record in building scalable digital experiences and user-centered design solutions. Adept at designing end-to-end user experience workflows, from user research and wireframing to high-fidelity prototyping and implementation. Specialized in leveraging design tools like Figma and Sketch for comprehensive design systems, and prototyping platforms like InVision and Framer for building interactive, user-focused applications. Proven experience in deploying human-centered design solutions that blend usability, accessibility, and visual appeal, delivering measurable user engagement improvements across diverse digital products. Passionate about pushing the boundaries of user experience design and creating intuitive interfaces in production-grade environments.

Education

Bachelors of Technology in Software Technology

- University of vocational technology - Rathmalana
- Relevant Coursework: Machine Learning, AI, Data Structures, Software Engineering, Cloud Computing

Work Experience

Software Engineer | CodeGen International (Pvt) Ltd

- Designed and developed frontend interfaces using React.js and Tailwind CSS for enterprise-level web applications.
- Created end-to-end UX designs for internal CRM and ERP systems (RamaDBK project).
- Led UX design for Rise Management mobile application focused on user efficiency and accessibility.
- Designed and implemented the frontend for an AI-powered "Sketch to Face" application using React.js + Vite, styled with Tailwind CSS.
- Developed web scraping pipelines using Selenium in Python with rotating proxy servers for training GenAI models.

UI/UX Engineer | AbsolXCoreAI

- Designed and implemented user-centric interfaces and frontend components using React.js for AI-driven platforms.
- Developed and deployed domain-specific AI agents powered by custom fine-tuned large language models (LLMs).
- Engineered machine learning pipelines with real-time inference, integrating multimodal capabilities (e.g., computer vision, NLP).

Skills

Languages: HTML 5, CSS, JavaScript, Python
Databases: MongoDB, MySQL
Libraries & Frameworks: React.js, Flutter, Next.js, Tailwind CSS, Vue JS
Tools & Technologies: Git, GitHub, Figma

UX Engendering: UX Research, Usability testing, Qualitative usability testing, Regression testing, Acceptance testing

Projects

Frontend Developer – RamaDBK Web Application June 2025 – Present
Rama DBK

- Developed and maintained the frontend using React.js for a vehicle export company's dynamic website.
- Integrated motion-based animations and image sequences to enhance user engagement and UI responsiveness.
- *Technologies*: React.js, Tailwind CSS, Framer Motion.

Frontend Developer – UOVT eCommerce Platform Oct 2024 – Dec 2024
UOVT eCommerce

- Built a responsive frontend for an eCommerce platform using Next.js and integrated Wix backend services via plugins.
- Ensured seamless integration of API endpoints and enhanced user experience through optimized UI components.
- *Technologies*: Next.js, Tailwind CSS, Wix API.

UX Designer – Rise Management System Mar 2025 – Apr 2025
Rise Management App

- Conducted extensive user research, surveys, and usability testing to guide UX improvements.
- Created detailed user personas, journey maps, and wireframes to optimize app navigation and workflows.
- Collaborated with stakeholders to deliver a scalable, user-centric design system.
- *Tools*: Figma.

Volunteer UX Designer – Vega Website Feb 2024 – Apr 2024 Vega

- Collaborated on UI/UX design for the Vega project, from concept to high-fidelity prototypes.
- Led research, prototyping, and user testing to develop intuitive and accessible interfaces.
- Delivered structured wireframes and user flows to align design goals with business objectives.
- *Tools*: Figma.

AI Agent Developer – Agronomics Agent Working on
Agronomics Agent

- Developed an AI-powered Agronomics Agent using LangGraph and Retrieval-Augmented Generation (RAG) to answer domain-specific questions in real-time.
- Implemented vector database integration to support dynamic knowledge updates whenever administrators upload new agronomics data.
- Designed and developed a modern frontend in React.js with Tailwind CSS, ensuring an intuitive and responsive UI/UX.
- Engineered a real-time pipeline for knowledge ingestion and retrieval, improving accuracy and efficiency of query responses.
- Technologies: LangGraph, RAG architecture, React.js, Tailwind CSS, Vector Databases.

Full Stack Developer – AI Voice & Chat Agent August 2025 Agent

- an AI agent with Python and LiveKit for real-time voice and chat, integrating STT, TTS, and noise cancellation .
- Developed a React.js frontend with Tailwind CSS and Framer Motion for an interactive UI .
- Created backend services using Flask and WebSockets for session and token management .
- Integrated SQLite for VIN-based car profile creation, lookup, and retrieval .

- Leveraged OpenAI LLMs with function calling to handle dynamic queries .
- Technologies: Python, LiveKit, React.js, Flask, SQLite, Tailwind CSS, Framer Motion .
